PROFESSIONAL SUMMARY

UX Designer with 3+ years of experience designing end-to-end digital products including AI-driven tools, SaaS platforms, and complex dashboard systems. Proven ability to simplify large-scale, data-heavy workflows into intuitive, accessible, and scalable user experiences. Experienced collaborating with cross-functional teams (engineering, product, and business stakeholders) in fast-paced environments. Strong foundation in information architecture, design systems, accessibility standards, and developer handoff — with a track record of delivering 100+ production-ready screens on time.

TECHNICAL SKILLS

Design Tools: Figma, FigJam, Adobe Photoshop, Adobe Illustrator, Notion

UX Competencies: User Research, Wireframing & Prototyping, Information Architecture, Usability Testing, Accessibility (WCAG), User Flows, Interaction Design

UI Competencies: Design Systems, Component Libraries, Dashboard & Data-Heavy UI Design, Visual Design, Typography, Responsive Web & Mobile Design

Development Awareness: Basic HTML & CSS, Developer Handoff, Cross-functional Collaboration

WORK EXPERIENCE

UI/UX Designer | HestaBit

Noida, India | Apr 2023 – Present

- Designed end-to-end UX for 5+ web and mobile products — including AI-powered tools, enterprise dashboards, and data-heavy reporting interfaces — improving information clarity and user task completion rates.
- Developed a scalable component-based design system in Figma, reducing design-to-development handoff time by ~30% and ensuring visual consistency across all product surfaces.
- Translated complex data requirements and business logic into intuitive user flows, wireframes, and high-fidelity prototypes, cutting stakeholder revision cycles.
- Delivered 100+ production-ready screens for a complex AI product under tight timelines, recognized internally for structured approach and design clarity.
- Collaborated daily with engineers, product managers, and business analysts in agile workflows to ship scalable, production-ready designs on schedule.
- Championed accessibility and WCAG compliance principles in all product designs, improving usability for diverse user groups.

Graphic Designer | AB Web Technologies

Noida, India | Feb 2022 – Mar 2023

- Designed digital assets — social media creatives, marketing collateral, and brand identity visuals — ensuring consistent visual language across platforms.
- Built a strong foundation in layout, typography, visual hierarchy, and brand guidelines, skills directly applied to later UX design work.
- Partnered with marketing and content teams to produce engaging visuals that improved user engagement across digital channels.

KEY PROJECTS

Helpline Club — AI Voice Platform

- Designed a scalable, voice-first UX system supporting multiple AI helpline categories, serving a diverse and non-technical user base.
- Architected the onboarding experience and category-based information architecture to reduce user drop-off and improve helpline discovery.
- Prioritized accessibility and clarity as core design pillars to ensure long-term scalability across expanding AI helpline offerings.

Hunter AI — Sales Coaching Platform

- Designed role-based dashboards and AI-driven coaching workflows for sales teams, translating complex performance data into clear, actionable insights.
- Improved usability of scoring systems, coaching simulations, and report views — reducing cognitive load and increasing feature adoption.
- Worked with product and engineering to ensure designs were both technically feasible and aligned with business KPIs.

EDUCATION

Bachelor of Arts, Psychology | Indira Gandhi National Open University

Jul 2023 – Jul 2026 (Expected)

Relevant coursework in cognitive psychology and human behavior — directly applicable to user research and human-centered design.

ACHIEVEMENTS & RECOGNITION

- Delivered 100+ screens for a complex, multi-phase AI product under tight deadlines, maintaining high design quality throughout.
- Designed reusable component systems adopted across multiple product phases, enabling faster design iterations and developer velocity.
- Recognized internally at HestaBit for structured, clarity-driven design approach and ability to handle high project volume simultaneously.
